

CMMR 2010

music is in the sound

Málaga (Spain), June 21-24

Symposium Chairs

Isabel Barbancho
Universidad de Málaga
(Spain)

Kristoffer Jensen
AAUE
(Denmark)

Sølvi Ystad
CNRS-LMA, Marseille
(France)

Proceedings Chairs

Richard Kronland-Martinet
CNRS-LMA (France)

Sølvi Ystad
CNRS-LMA (France)

Kristoffer Jensen
AAUE (Denmark)

Organizing Committee

Ana M. Barbancho
Universidad de Málaga
(Spain)

Lorenzo J. Tardón
Universidad de Málaga
(Spain)

Enrique Márquez-Segura
Universidad de Málaga
(Spain)

Alberto Peinado
Universidad de Málaga
(Spain)

Andrés Ortiz
Universidad de Málaga
(Spain)

Cristina Urdiales
Universidad de Málaga
(Spain)

Paper and Program Chairs

Mitsuko Aramaki
CNRS-INCM
(France)

Richard Kronland-Martinet
CNRS-LMA
(France)

Call for Papers

The **7th International Symposium on Computer Music Modeling and Retrieval** will be held in Málaga (Spain) on 21th-24th June 2010 and it will be organized by the ATIC group of the Universidad de Málaga (Spain), together with LMA and INCM (CNRS, France) and AAUE (Denmark).

The field of computer music is interdisciplinary by nature and closely related to a number of computer science and engineering areas such as information retrieval, human computer interaction, digital libraries, hypermedia, artificial intelligence, acoustics, signal processing, etc.

CMMR 2010 invites researchers, educators, composers, performers, and others with an interest in important aspects of computer music (including modeling, retrieval, analysis, and synthesis) to join us for a unique event.

Original contributions are encouraged in, but not limited to, the following topics:

- Auditory perception and cognition
- Virtual reality, augmented reality and human-computer interaction
- Digital music libraries
- New methods for music representation and visualization
- Retrieval and recommendation tools
- Games and interactive learning
- Music production and composition tools
- Structuring of audio data
- Cooperative music networks
- Analysis, recognition, comparison, classification, and modeling of sound and music
- Music and sound data mining
- Sound synthesis
- Optical music recognition
- Semantic music technologies
- Sound source separation
- Music structure analysis
- Music transcription
- Artificial intelligence and cognitive science for sound and music

Submission

Procedures to submit papers, posters, panels and demo sessions are detailed at www.cmmr2010.etsit.uma.es. Submitted papers must be camera-ready conforming to the format specified on the CMMR 2010 website. It is planned to publish accepted papers in the Springer Verlag Lecture Notes in Computer Science (LNCS) Series.

Important dates

Submission deadline	February 1st, 2010
Notification of acceptance	March 15th, 2010
Camera-ready copy	May 1st, 2010
